“

Peter Loizou was hired to do our upstairs and downstairs extension. We had a vision of what we thought was possible but when Pete saw the space we were wanting to extend, he made differing suggestions to what we were thinking. We put our trust in him and he delivered an extension that was infinitely better than what we had envisaged. Because of his ideas and making possible what other builders said was impossible, we have a seamless downstairs extension that we are thoroughly enjoying. His 'can do' attitude is refreshing in a trade where 'sucking teeth' is the norm. Thanks to you Pete we are enjoying our home the way we had always wanted to!

“

I was looking for a builder to carry out an extension on my house or a double Dormer loft conversion. I had spoken and had quotes by several builders. However by chance I met Pete through a mutual friend. Pete visited and he was so insightful and had several ideas which he was able to convey across. His quote was also very reasonable. Pete and his team began working quickly we were kept informed all the time work was being carried out. Pete was also able to give ideas especially on aspects of finding ways to improve the build. The end result was amazing the rooms we ended up with were of the highest quality and Pete actually managed to improve the space for the rooms. The after care is also amazing Pete has called to check and even stopped to check in to make sure everything is up to standard.
